

Translation

FEATURES

- The translation extension in Magento 2 is a powerful tool that allows you to easily translate your online store into different languages. Here are some key features of the translation extension:
- Multi-language Support: The extension enables you to translate your store content, including product descriptions, categories, CMS pages, and more, into multiple languages.
- CSV Import/Export: The extension supports CSV file import and export, which makes it convenient to manage and update translations in bulk. You can export the translation file, make changes offline, and import it back into Magento.
- Language Switcher: The translation extension includes a language switcher, which enables your customers to easily switch between different languages on your storefront. This enhances the user experience and makes it more accessible to a global audience.

Ultimate Guide for Magento 2 Translation

Easy Translator extension allows you to translate your Magento store text from the admin area, instead of having to find and edit the right CSV file. The extension can be configured at the store view level which allows you to use translations in the frontend only on selected store views. Text translations can be added per store, website, or global translation. The extension also allows you to add text translations at the module level, allowing you to translate a particular text only when the text comes from a certain module.

- Mention that the module allows you to translate store content into different languages easily.
- log in to your Magento 2 admin panel and go to Stores > Configuration. Under the General tab, select Locale Options and set the Locale option to the desired language And Save
- you need to create store views for the languages you want to translate your store into. Go to Stores > All Stores and click on Create Store View. Enter the necessary information, including the store name, code, and language. Save the changes and repeat this step for each language you want to add.
- Magento 2 allows you to translate static content, such as product descriptions, category names, and CMS pages. To translate static content and text.

Overall, the translation extension in Magento 2 provides a comprehensive solution for translating your online store, making it easier for customers from different regions to understand and engage with your website.

How to install the extension

1. Install via composer (recommend)

- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **composer require mageinic/translation**
- Run the command **php bin/magento module:enable MagelNIC_Core MagelNIC_Translation**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.

2. Upload via ZIP/Archive

- Back up your store's database and web directory
- Download the extension zip file and extract the zip file
- Transfer the **MagelNIC** folder to the Magento 2 **app/code/** directory on the server
- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **php bin/magento module:enable MagelNIC_Core MagelNIC_Translation**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.

Translation List

	Original Text	Translate Text	Store View	Locale	Edit
<input type="checkbox"/>	Boys	أولاد	All Store Views	Arabic (Saudi Arabia)	Edit
<input type="checkbox"/>	Suits	بدلة	Arabic	Afrikaans (South Africa)	Edit
<input type="checkbox"/>	Men	رجال	All Store Views	Arabic (Saudi Arabia)	Edit
<input type="checkbox"/>	Girls	فتيات	All Store Views	Arabic (Saudi Arabia)	Edit
<input type="checkbox"/>	Women	نساء	Arabic	Arabic (Saudi Arabia)	Edit

- For this example let's translate the **Free Gift** Text

- Check and verify text. Also, You can see the updated text on the frontend side

Note

- **Store View** - you select store views only in case you have a multi-website with 2 store views in the same language and want to add different translations for each of them. e.g. you have a German (Germany) store view on Website #1 and a German (Germany) store view on Website #2 and want to have different translations for each of these store views.
- **Locale** - make sure you set different locales for each of your store views when creating store views. If you don't set the locale translations won't be applied.
